

Installation manual

Installation instructions:

1. copy folder 675444 to htdocs folder
2. Access <http://localhost/675444/> through web browser (if running remotely localhost would be replaced by server's url). This page offers options to access client pages, cms pages and admin pages. If the database is not ready, the browser is redirect it to the cms index page which creates the database and all the necessary tables.

The product has been tested on:

- Google Chrome (Version 26.0)
- Internet Explorer (Version 10.0)
- Firefox (Version 19.0)

It is running on Apache Server (version Apache/2.4.2 (Win32) OpenSSL/1.0.1c PHP/5.4.4), using MySQL database (version mysqlnd 5.0.10).
