User manual

There are 3 kind of pages. CMS pages for Content Management System, Admin pages for staff, and Client pages for end customers.

CMS Pages:

Content Management pages are providing functionality to set up the online shop.
Accessible at "675444/cms ".

Recommended start is to click on insert testing data link to see the full functionality of the application.

Functionality:
- creating, editing and deleting products
- creating and deleting categories
- listing and searching through all the products
- setting design for the website
- erasing all data (for fresh start)
- inserting testing data (for marking purposes)

It is possible to upload files as a part of product or category description. If no file or invalid file is uploaded a default picture is used (picture of question mark).

CMS Pages:

Admin pages are designed to be used by online shop employees.
Accessible at "675444/admin".
Functionality:
- marking orders as distributed (sent to custome)
- setting a warning limit (e.g. if stock gets below 10 inform the user of the need to restock)
- displaying sales over set period of time and total profit over the set period
- listing all product and capability to change quantity of product in stock

Client Pages:

Client Pages are designed for end users (customers who are buying products).
Accessible at "675444/client".
Functionality:
- browsing and searching through items
- displaying items by category
- sorting items (e.g. by price)

- adding items to basket
- managing basket (removing items, buying products)
